## **Allen-Bradley Training Systems**

Future Tek, Inc's SIM PLC Training Systems provide hands on programming and troubleshooting training utilizing our step-bystep lab manuals. Our new SIM offerings include connecting ports allowing development of Ladder Logic programs controlling Festo MecLab<sup>®</sup> Training Systems.

Future Tek Model L24-EDP-SIM

#### **Compatible with Festo MecLab<sup>®</sup> Training Systems**

**Conveyor Station** 

**Stack Magazine Station** 

**Handling Station** 

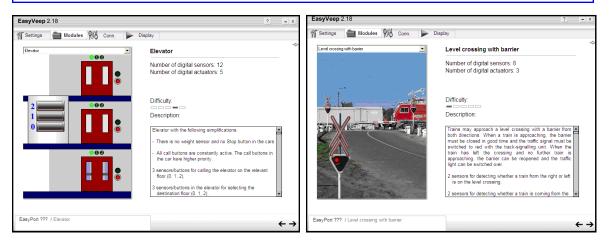

### **Allen-Bradley Training Systems**

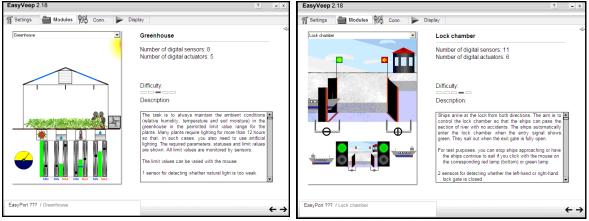

Future Tek, Inc's SIM series, also, includes Festo EasyVeep<sup> $\mathbb{R}$ </sup> Simulation Software connection. The Festo EasyVeep<sup> $\mathbb{R}$ </sup> Software provides interactive PLC control of real-world processes through simulation. Below are a few examples of the simulated processes .
