

Model 2515 Specifications

Model 2515 Training Package includes:

- Model 2515 Transformer Training System enclosed in a dust proof Suit-case
- Power Cord
- Lab Manuals: Transformer Trainer Instructor's Manual
Transformer Trainer Student's Manual
- CD: Instructor Animated Step by Step Wiring PowerPoint for each lab

Trainer Dimensions

32" x 23" x 16"

55 lbs

General Description

Future Tek Model 2515 Transformer Training System allows the student to hard wire transformers in many various configurations. The student will learn how the voltages, currents, and watts are affected through the different transformer configurations. They will work out the formulas, wire the transformers, and take true readings from the trainer to prove the formula's results. The configurations the students will be using are single phase transformers, buck/boost transformers, transformer polarity, auto transformers, three phase transformers, closed delta, and open delta configurations. Components are mounted on nonconductive black textured panel in a heavy duty case.

The Model 2515 Transformer Training System is an excellent way to prove transformer formulas and theories by taking true measurements through the many different labs provided.

FUTURE TEK, INC.

Model 2515 Specifications

Model 2515 Components List

Qty	Description
6	0.75 kVA Transformers
3	25 Watt Bulbs
1	Three Phase Breaker Switch
1	208 VAC Three Phase Five Wire Source Voltage Twist Lock Male Receptacle
1	15' Five Conductor SO Cable with Female Twist Lock Female Receptacle
18	Terminal Blocks
1	Terminating Screw Driver
1	Instructor Animated Step by Step Wiring PowerPoint for each Lab
1	Instructor Manual
1	Student Manual
